## Actuator Test Equipment

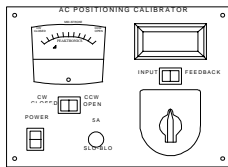

**CLC-100**

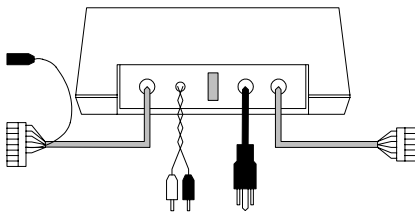

**SPC-100**

**APC-100**

Control Panel

Back Panel

Model	Description	List
CLC-100	Current Loop Calibrator (4-20mA generator for calibrating all 117VAC AMC-100/101, LRC-101, and SVC-100 units)	\$ 337.50
SPC-100	Switch/Pot Calibrator (Open-close motor switch used to calibrate actuator limit switches and binding posts to monitor feedback pot resistance. Works with all 117VAC AMC-100/101, LRC-101, and SVC-100 units.)	\$ 250.00
APC-100	AC Positioning Calibrator (Bench style calibrator with feedback pot meter, 4-20mA generator, and 4-20mA digital input/feedback meter for calibrating 117VAC positioners; VCM Modules adapt unit for other voltages.)	\$ 1,250.00
VCM-100	Voltage Converter Module, 24VAC (Plugs into APC-100 to convert 117VAC power to 24VAC for calibrating 24VAC actuators.)	\$ 375.00
VCM-101	Voltage Converter Module, 234VAC (Plugs into APC-100 to convert 117VAC power to 234VAC for calibrating 234VAC actuators.)	\$ 375.00
VCM-102	Voltage Converter Module, 12/24VDC (Plugs into APC-100 to convert 117VAC power to 12/24VDC for calibrating 12/24VDC actuators.)	\$ 812.50
CIC-100	Calibrator Interface Cable (Interfaces APC-100 calibrator to FTE-100/101 enclosures.)	\$ 125.00
