## AC Motor Controllers (AC analog servo)

**AMC-100  
AMC-100B  
AMC-100D**

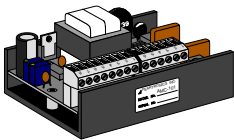

The **AMC Series** AC Motor Controllers are tried and proven products in a wide variety of applications using a wide assortment of AC electric actuators. The Peaktronics AMC Series is slowly becoming the standard of the industry.

### AC to DC Converter Modules

The **ADM** modules convert a DC actuator to an AC actuator providing 3-wire control from common form-C contacts for Open/Close applications. Built-in electronic braking provides precision control for Modulating applications. Its compact size allows it to mount inside most DC actuators while still allowing space to mount standard Peaktronics controls. Combining a 24VAC controller (above) with an ADM-100 module provides a complete 24VAC actuator with positioner using a DC actuator.

Model	Motor Voltage	Locked Rotor Current	Screw Mount	Strap Mount	List
ADM-100	24VDC	15A	X	X	\$ 123.25
