Digital High Resolution Solenoid Valve Controllers (AC digital pneumatic servo)

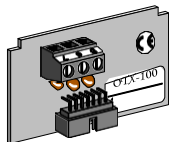

DHC-200
DHC-200A
DHC-200B

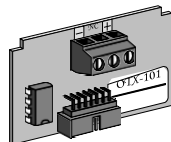

The **DHC Series** High Resolution Solenoid Valve Controllers provide the optimum positioner for virtually any pneumatic actuator. The DHC-200 Series are directly interchangeable with the SVC Series.

- **Adaptive Control** feature continuously adjusts for load and actuator conditions providing up to 450 points of resolution with actuators ranging from 5 sec to 120 sec.
- Three button control provides easy setup and eliminates the need for instrumentation, calibration procedures, and auto-cal operations.
- **Polarity Detection** feature allows direct or reverse acting operation without re-wiring.
- **Stall Detection** feature turns off solenoids when a stall condition is detected.

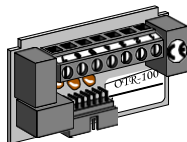

Voltage	Model	List
117VAC	DHC-200	\$ Call
234VAC	DHC-200A	\$ Call
24VAC	DHC-200B	\$ Call

OTX-100

OTX-101

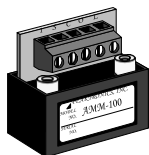

OTR-100

OCM-102

Option Modules

Model	Description	List
OTX-100	Current / Voltage Transmitter (adjustable)	\$ Call
OTX-101	Isolated 2-wire 4-20mA Transmitter (adjustable)	\$ Call
OTR-100	Transmitter (adjustable) and Relay module	\$ Call
OTR-101	Isolated Transmitter (adjustable) and Relay module	\$ Call
OCM-102	Modbus Module (Isolated RS-485 connection)	\$ Call

AMM-100

Accessories

Model	Description	List
AMM-100	Auto/Manual Station interface module	\$ Call
SIG-100	1-5 / 2-10 VDC Signal Adaptor	\$ Call
